Packt Publishing Limited, United Kingdom, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Solve different problems in modelling deep neural networks using Python, Tensorflow, and Keras with this practical guide About This Book * Practical recipes on training different neural network models and tuning them for optimal performance * Use Python frameworks like TensorFlow, Caffe, Keras, Theano for Natural Language Processing, Computer Vision, and more * A hands-on guide covering the common as well as the not so common problems in deep learning using Python Who This Book Is For This book is intended for machine learning professionals who are looking to use deep learning algorithms to create real-world applications using Python. Thorough understanding of the machine learning concepts and Python libraries such as NumPy, SciPy and scikit-learn is expected. Additionally, basic knowledge in linear algebra and calculus is desired. What You Will Learn * Implement different neural network models in Python * Select the best Python framework for deep learning such as PyTorch, Tensorflow, MXNet and Keras * Apply tips and tricks related to neural networks internals, to boost learning performances * Consolidate machine learning principles and apply them in the deep learning field * Reuse and adapt Python code snippets to everyday problems * Evaluate the cost/benefits and performance implication of each discussed solution In Detail Deep Learning is revolutionizing a wide range of industries. For many applications, deep learning has proven to outperform humans by making faster and more accurate predictions. This book provides a top-down and bottom-up approach to demonstrate deep learning solutions to real-world problems in different areas. These applications include Computer Vision, Natural Language Processing, Time Series, and Robotics. The Python Deep Learning Cookbook presents technical solutions to the issues presented, along with a detailed explanation of...
