

Translating Clinical Trial Outcomes Measures: An Overview

By Diane Wild

Seed Medical Publishers. Paperback. Condition: New. 86 pages. Dimensions: 7.5in. x 5.0in. x 0.2in. The purpose of this book is to provide a general overview of the translation and cultural adaptation process of clinical research survey instruments with a focus on the linguistic aspects of the process. Survey instruments here refer to any text, printed or electronic, prepared in order to collect information in a clinical research setting. This broad definition covers patient-reported, clinician-reported, and caregiver-reported outcomes measures, as well as patient diaries, indexes, scales, symptom checklists, etc. The first part of the book offers a brief introduction to selected linguistic aspects of translation in order to provide definitions of key linguistic concepts and to set a tentative theoretical framework for the translation and cultural adaptation process. The second part describes the main steps used in the translation process. The discussion of each step includes the definition of its most important component, a list of key professional involved in implementing the step, a detailed critical description of the process involved in the implementation of the step, as well as a brief overview of areas where more research is needed. The last chapters cover the translation of electronic versions of clinical research...

Reviews

It is easy in read through easier to fully grasp. it had been writtern very completely and useful. I am pleased to let you know that here is the greatest book we have read during my personal life and could be he very best book for possibly.

-- Miss Marge Jerde

It is really an remarkable publication i actually have possibly study. It usually is not going to cost excessive. Its been written in an exceedingly basic way and is particularly only right after i finished reading this publication through which basically transformed me, affect the way i think.

-- Dr. Breana O'Kon
