

Genomics III: Methods, Techniques and Applications (Paperback)

Filesize: 1.2 MB

Reviews

This publication is wonderful. It can be rally fascinating throgh reading period of time. You are going to like the way the writer create this publication.

(Mrs. Piper Jacobi)

GENOMICS III: METHODS, TECHNIQUES AND APPLICATIONS (PAPERBACK)

[DOWNLOAD](#)

Iconcept Press, United States, 2014. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Genomics is the study of the genomes of organisms. The field includes intensive efforts to determine the entire DNA sequence of organisms and fine-scale genetic mapping efforts. It is a discipline in genetics that applies recombinant DNA, DNA sequencing methods, and bioinformatics to sequence, assemble, and analyse the function and structure of genomes. Genomics III - Methods, Techniques and Applications is the last volume of our Genomics series. Chapter 1 presents an overview of exome sequencing technology and details its use in identification of molecular bases of rare diseases in human. Chapter 2 describes and compares different methods of whole genome amplification (WGA) for replenishing DNA samples for genetic studies. Chapter 3 illustrates the method of whole genome microarray gene expression profiling and its application to study the treatment effect of a widely used cardiovascular drug. Chapter 4 describes a brief history of large-insert libraries and their utility in exploring organisms with poor genetic and genome information. Chapter 5 proposes a bio-molecular approach for the evaluation of the anaerobic digestion performance. In Chapter 6, quantitative issues of the transposon-based gene delivery methods are addressed. Using the Sleeping Beauty transposon system as a prominent example, special detailed focus is given to copy number determination and to transposon excision efficiency quantification by real-time PCR based methodologies. Chapter 7 provides an overview of extraction of a compendium of sequence and structural features, as well as the methodology for function prediction based on the techniques from Artificial Intelligence and Machine learning. Chapter 8 presents a statistical method and a data mining solution for the problem of insertion site analysis and characterization of Alu elements Chapter 9 investigates how Mutual Information (MI) can be used to improve...
