SPATIALLY VARYING COEFFICIENT REGRESSION MODELS

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | Diagnostic and Remedial Methods for Collinearity | The realization in the statistical and geographical sciences that relationships between explanatory variables and a response variable in a regression model may vary across a study area has led to the development of regression models with spatially varying coefficients. Two such models are geographically weighted regression and Bayesian regression models with spatially varying coefficients. In the application of these models, inference on the regression coefficient spatial processes is typically of primary interest. The presence of collinearity...
